Conewango's Triangular Replacement Liner Family

MR-T3-V Standard service life of 1200 to 1500 cow milkings with a 57mm head to fit the Conewango WJ-S jetter cups or 57mm poly wash blocks.

MR-T4-V Extended service life of 2500 cow milkings with a 57mm head to fit the Conewango WJ-S jetter cups or 57mm poly wash blocks.

MR-T3-51V Standard service life of 1200 to 1500 cow milkings with a 51mm head to fit the Conewango WJ-GT jetter cups or 51mm poly wash blocks.

MR-T4-51V Extended service life of 2500 cow milkings with a 51mm head to fit the Conewango WJ-GT jetter cups or 51mm poly wash blocks.

- The MR-T3-V and MR-T3-51V are manufactured in our time tested natural rubber formulation for superior milking performance in terms of milk-out and liner slip.
- The MR-T4-V and MR-T4-51V are manufactured in our proprietary long life formulation for comparable performance to Conewango's time tested natural formulation.
- All Conewango Impulse style liners are vented in the milk tube for faster milk-outs and less chance for bacterial contamination. Regardless of vent location, all vented liners move milk away from the teat end for faster milking, improved flow rates, drier teat ends, and better unit detachment.
- Vent-seats with a rubber grommet molded around the vents for improved vent retention.
- The MR-T3-V and MR-T4-V are also available non-vented.
- Guaranteed to outperform your current brand or your money back.
